Hello,

I am an inventive and self-starting **Frontend Developer** with passion for responsive web design, animations and a firm believer in the mobile-first approach. I've learnt to google, understand documentations and read endless amount of error messages.

I am currently seeking a junior position where I will be able to improve my skills by working alongside other talented IT professionals in creating websites meeting the very highest standards.

Key skills

HTML5, CSS/SCSS

JavaScript/ES6

React, Redux

GSAP

Figma

Adobe Photoshop

Axios / RestAPI

Git/GitHub

Responsive Web Design

Well organised

Highly adaptable

Team working

Communicative

Detail oriented

Problem solving

Creative

Experience

Open Source Projects

SARO - *currently*

Collaboration on an international project of language proficiency app (polish lessons for english, japanese and korean speakers).

My main areas of contribution:

Admin Panel/CMS

Implementing new and improved layout

The project is built using **React, Redux** along with **SCSS, Firebase** authorization and database

It follows **atomic design** methodology and **mobile first** approach.

Education

For the last year I have been learning technologies by going through multiple online courses and trainings (**Coursera, Udemy, Codecademy**), documentations and following YouTube creators in order to gain the knowledge and solve occuring problems.

I believe learning-by-doing is the most effective way of mastering new skills so I participate in Open Source projects and always have a side-project in progress. *Take a look* at some of the latest I've dedicated my time to.
